

Joint Capabilities & Competences

■ Biotechnological Process Developments

- Microbial fermentation
- Cell culture
- Organ extraction
- Chromatographic purification
- Virus testing
- Quality control
 - Protein characterization
 - Impurities
 - Microbiology

■ Pharmaceutical Engineering

- Galenic formulation
- Pharmaceutical formulation
- Stability testing

■ Market Supply

(own brands / contract manufacturing)

- API production (cGMP)
- Drug production (cGMP)
 - solid
 - liquid
 - lyophilized
 - sterile ointment

■ Services

- Approval support (EMA, FDA)
- Clinical studies (design & monitoring)
